

After Action Optimization Guide

Event/Process/Tactic: _____ Date: _____

Name: _____

I. What worked?

II. What didn't?

III. What did we learn?

IV. What could we test or do differently next time to improve our results/outcomes?

V. What will we do differently next time in order to obtain a better result/outcome?

Note: This works best if you are creating a system (documenting the process) so you can test and systemize the best results, test by test.
